## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 17-31 and 49, drawn to a composition.

Group II, claim(s) 32-43, drawn to a composition.

Group III, claim(s) 44, drawn to a composition.

Group IV, claim(s) 45-47, drawn to food product.

Group V, claim(s) 48, drawn to a method of making.

2. The inventions listed as Groups one through five do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common concept linking together the independent claims 17, 32, 44 and 45-49 is a nutritional composition having an energy density of at least 1.45 Kcal/ml and comprising carbohydrate, protein and lipid fractions. This concept is not novel because TROUP (WO 2004/026294) teaches a nutritional formulation having a caloric density of about 1.5 Kcal/ml and containing carbohydrate, protein and lipid fractions (p. 11, lines 14-15; p. 7, lines 23-31).

Art Unit: 1619

3. A telephone call was made to Gilberto M. Villacorta on 03/06/2009 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. With regard to the separation of groups one and two: the limitation --the protein fraction comprises less than 5 wt.% of free amino acids and at least 8.2 grams of intact protein per 100 mL-- distinguishes group two. Groups one and two are not obvious variants and would require an additional search.

4. The examiner has required restriction between product and process claims.

Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

Art Unit: 1619

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. **Failure to do so may result in a loss of the right to rejoinder.** Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
